

# THE AI SPEED ILLUSION

## >\_ OBSERVATION 01

Hours wasted untangling and verifying foreign AI code.

## >\_ OBSERVATION 02

Constant waiting and context-switching destroys deep developer flow.

## >\_ OBSERVATION 03

DORA metrics are dragged down by a ticking time bomb of unverified code.

# Engineered strictly in the engine room

## Track Record Dashboard

**10+**

**Years deep in  
Spring Boot  
engine rooms.**

Includes 6 years as a purely  
hands-on technical consultant.  
Operating long before the LLM  
hype.

**10,000+**

**Developers blindly  
trust the testing  
academy.**

Founder of one of the most  
recognized Spring Boot blogs  
and specialized testing  
academies in the industry.

**Zero shiny  
PowerPoints.**

I am Maruan. I do not deliver  
generic theory; I get my hands  
dirty directly in your code.

# The 30-Day Build-Time Turbo Sprint

## 01 The Ruthless Baseline Audit

An unvarnished analysis to uncover hidden productivity killers in the current setup.

## 02 The Build-Time Turbo

Grabbing low-hanging fruit directly in the code **optimizing Spring Context Caching** and drastically speeding up Testcontainers.

## 03 The Pipeline Sanitation

Ruthlessly eliminating **flaky tests** so developers can rely 100% on green and red lights again.

## The Custom MCP Server Skill

I make myself obsolete. We inject my 10 years of concentrated testing expertise directly into your developers' IDEs - an an autopilot that effortlessly secures your phenomenal new build times.

- A guaranteed 50% reduction in Spring Boot build times in 30 days.
- If we don't reduce build times by at least 30% black-and-white, you get your money back. No ifs, no buts.

**Let's sit down next Tuesday morning for a 45-minute deep dive to sketch a tailored strategy. Completely no-strings-attached.**
